John Leo Kaufman Borgeest & Ryan LLP

John Leo is an attorney with Kaufman Borgeest & Ryan LLP in its Parsippany, New Jersey office. John practices in the areas Medical Malpractice Defense, Long Term Care and Nursing Home Defense, Professional Liability Defense, Premises Liability Defense, and Construction Accident Defense, in the state and federal courts of New Jersey and Pennsylvania

Update On State-Wide Initiatives and Activities Report From New Jersey Hospital Association

Jonathan Chebra NJHA, Director of Government Relations and Policy

Jonathan Chebra is the Director of Government Relations and Policy for the New Jersey Hospital Association. Jon advocates on behalf of the association's nearly 400 acute and post-acute members for public policy to better serve their patients.

He works daily with New Jersey legislators and administration officials on legislation and public policy proposals that affect our healthcare and the way it's delivered, always with a goal of expanding coverage and access to high quality care.

Jon previously served as Chief of Staff for Assemblyman Herb Conaway, the Chair of the Assembly Health and Senior Services Committee. During his tenure, he wrote and advanced a number of key healthcare initiatives, including measures expanding access to treatment for chronic diseases and tackling opioid abuse.

Prior to that, he worked for U.S. Senator Frank Lautenberg in his Capitol Hill office, performing many duties including economic policy staffer. Jon has also worked on numerous political campaigns on the local, state and federal levels, and remains politically active in his community

Changing Dynamics in the Medical Professional Liability Insurance Market

- Review recent developments affecting the insurance market conditions for the healthcare industry, including underwriting performance of carriers from financial & economic standpoint.
- Discuss impact of cyber liability, governmental regulatory investigations, workplace violence and other issues affecting medical malpractice insurance carriers.
- Discuss the changing legal environment in healthcare.

Kevin Boland AVP, Healthcare Practice, Lockton Companies

Kevin is an Account Executive in Lockton Companies' Northeast Healthcare Practice and is responsible for insurance program development, negotiation, placement, and service for clients in the healthcare industry. Kevin has over 15 years of experience in the insurance industry, both as an underwriter and broker, with a focus on medical malpractice coverage. Kevin has been a member of SHCRMNJ since 2014.

First Do No Harm: Recognizing and Addressing Impaired Physicians

- Review applicable laws regarding disability discrimination, age discrimination and drug testing in connection with impaired physicians.
- Discuss medical staff bylaw and contract provisions addressing issues associated with physician wellness, impairments and safe practice.
- Discuss best practices for recognizing and addressing impaired physicians.

Michael R. Bertoncini, Esq

Michael Bertoncini is a Principal in Jackson Lewis' Boston office. He regularly counsels healthcare organizations on management of employment law exposures, medical staff governance, and labor relations. Before joining Jackson Lewis, he was Deputy General Counsel at Steward Health Care System where he oversaw employment, medical staff and labor matters. Mr. Bertoncini is a cum laude graduate of Boston College where he earned a B.A. in History and was awarded the John A. McCarthy, SJ Award for the most distinguished Scholar of the College thesis. He earned his J.D. from Northeastern University School of Law. Mr. Bertoncini is a member of ASHRA and the American Health Lawyers Association's Labor and Employment Practice Group.

Julieann Diamond-Carrow, Esq.

Julieann Diamond-Carrow is Of Counsel in the Albany, New York, office of Jackson Lewis P.C. Ms. Diamond-Carrow has 20 years of experience in health law and provides legal counsel and business advice to health care entities and providers, including health systems, hospitals, nursing homes, and physician practices. She has extensive experience handling a wide range of transactional and operational matters, including corporate governance and authority, regulatory and compliance issues, physician arrangements, risk management and medical staff issues, advance directives and end of life decision making, provider and associate relations, and patient care issues. Her legal career started in private practice as a partner in an Albany based law firm where she served as external chief legal counsel of Ascension, St Mary's Healthcare in Amsterdam. She then transitioned to an in-house role where she served as Vice President and General Counsel of Ascension, St. Mary's Healthcare as a collaborative business partner and advocate through her dedication to practical, innovative and solution-driven advice to complex issues.

Accident Investigation Best Practices: Plan for the Unthinkable

- Appreciate the importance of a standardized immediate action plan for fact gathering and evidence preservation after an adverse event or near miss.
- Utilize established product, procedure, and process evaluation methods to determine the root cause of an adverse event or near miss.
- Follow a recent case study as an exemplar incident investigation including proper investigative steps leading to accurate conclusions that resulted in implementable recommendations to avoid incident recurrence.

Chris Schabowsky, PhD, CCE Senior Investigator, ECRI Institute, Plymouth Meeting, PA

Dr. Schabowsky is a biomedical engineer dedicated to improving healthcare by promoting patient safety, medical device efficacy, and value-based, cost-effective patient care. At ECRI Institute, he conducts accident and forensic investigation of adverse events involving healthcare technologies and procedures. During these investigations, he performs on-site inspections, examines incident devices, reviews nation-wide reports of related adverse events, determines the root cause of the adverse event, and provides recommendations on how to avoid incident recurrence. These investigations often lead to ECRI Institute publications to educate hospital members on best practices and incident prevention. His expertise encompasses evidence-based technology assessment, clinical program development, and strategic equipment planning. Often, he presents his team's findings and recommendations to the client's executive leadership as well as national conferences. Before focusing on consultation work, Dr. Schabowsky was a senior project engineer in charge of evaluating the functionality, safety, and human factors of medical devices across major suppliers. Example medical devices that he evaluated include surgical robots, physiologic monitoring systems, and surgical video systems. During his graduate academic studies, he led a team of engineers and clinical personnel to develop a rehabilitation robot from conception to preliminary functional testing.
